

First Name	Last Name	Current Year	Previous SWE Officer?	How long have you been a member of UARK SWE?	Officer Positions Preferred										Please describe how you would like to contribute to SWE.	Why do you want to become a SWE officer?		
					President	Executive Vice President	Vice President of Communications	Vice President of Development	Vice President of Conference Relations	Secretary	Outreach Coordinator	University Relations Coordinator	Product Development Manager	Membership Manager				
Braeley	George	Junior	Yes	3 years	X	X	X										I have spent the last year serving as SWE's University Relations Coordinator on the Engineering Student Council, so I have learned a lot about how other engineering RSOs operate and retain members. The main goal I have for SWE is establishing a solid member base since participation varies greatly from event to event. Right now, SWE is just something to put on a resume for a lot of people but I would really like for it to become a place where everyone feels like they belong. I would do this by establishing set monthly meetings outside planned events so that members can socialize. I have also already established relationships with other RSOs and would love to continue fostering SWE's relationships with them as to be more involved with the college as a whole.	SWE was the first RSO I joined on campus as a freshman and has remained my top priority RSO. I am passionate about the idea behind SWE in having a diverse group of women come together to share their ideas and believe this organization could become something really great if we have a committed team of officers in charge. I want to be a SWE officer again and put forth the effort to make SWE all that it can be by building this wonderful RSO back up. I also want to be an officer again because I love and appreciate all the opportunities SWE has given me to network with professionals and meet so many amazing peers.
Reagan	Gilker	Junior	Yes	3 years	X	X	X										Howdy! I would love to be an officer of SWE because I am very passionate about the purpose of SWE—empowering women. I want to continue having relevant, helpful events that our members actually want to go to. I want to create a community of regular SWE meeting attendees who are involved in making a difference in the women of engineering.	The reason I want to be an officer again next year is so I can continue empowering women. In a position of leadership, it would be much easier to help others. Also, being an officer this year made me into a leader, and I want to continue my personal development.
Samantha	Gundel	Freshman	No	2-3 months								X	X	X			As a member and possibly an officer of SWE, I would like to help promote the program on and around campus through activities that will create a positive impact in our community. As engineers, we have valuable knowledge and experiences that make us some of the best for the job, and I believe we should be taking advantage of that!	I want to become an officer for SWE so that I may gain leadership experiences that I have not had thus far and to make new friendships and relationships that may allow me to be successful as an engineer and to help other women in science and engineering to also be successful. As an officer, I could promote and grow this empowering and close knit community so that others around campus will know what we do and be inspired to join and help us do great things for our community.
Loren	Hedgecock	Freshman	No	September 2018-Present								X	X	X			I believe that SWE is an incredible organization. The current and previous members have done an amazing job with SWE. I would like to continue their successes, and be an advocate for SWE through community service. My ability to communicate well with people, and organized personality type makes me a great candidate to represent SWE.	I truly believe that SWE is an amazing organization. It has shown people across the country that women can thrive in the STEM field. I want to be a SWE officer, because I want to be a part of something that changes society in a good way. I want to show young women and men that gender nor ethnicity does not define what you can achieve in life. I want to inspire people the way that SWE has inspired me.
Meagan	Olsen	Sophomore	Yes	2 years		X				X	X						I want to help organize a broad variety of events for SWE, ranging from outreach and volunteering to professional development. This past year, I helped coordinate multiple outreach activities like volunteering with the Butterfield Science Club, and I know SWE has the potential to be involved in much more. I also want to increase the diversity of these activities and encourage a broader group of engineers to join. I can also contribute my strong organization and time management skills.	I want to become a SWE officer because I want to contribute to the organization and planning aspects of SWE in addition to participating in the events. I enjoy planning events and helping to promote access to volunteering opportunities, and being a SWE officer will enable me to provide this for other SWE members.
Jessica	Orton	Junior	Yes	3 years		X	X	X									I would like to increase member involvement by creating fun and engaging events as well as more activities at our general member meetings (like when we made the cards for the female faculty of the College of Engineering). I want SWE to be a fun, open and welcoming group (not that we aren't—sometimes we are just a little awkward!) and I think by increasing member engagement and activities at general member meetings, we will increase attendance to our other outreach and social events as well as create an environment that our members want to be in— they'll want to show up to our events and participate in all the cool things we do! I would also like to increase transparency in our membership process— I've had so many people ask me "How can I join SWE?" and I think by better advertising that we are an open organization that takes members at any time we can bring more people into our group.	I want to see SWE grow to be a closer and supportive group. I think we have made some great progress this past year in planning new and fun events but I still think there is some work to be done, and I want to have a hand in helping make that happen. I would also like to see us reach out and engage with the rest of the College of Engineering, not just SWE members. Our mission isn't just to serve ourselves and to grow ourselves, it is to create a positive impact in our community, and I would love for SWE to have a larger presence on campus and I think a great way to do that is to partner with other College of Engineering RSOs and groups. This past year I've helped to increase our campus presence by advertising our merchandise and events to non-SWE members. I've had friends and classmates from outside of SWE come to our events and purchase our shirts and stickers
Shantal	Sarmiento	Freshman	No	6 months				X		X		X					I would contribute with my leadership skills. I know how to manage people and delegate tasks so that everyone can work on the team and feel included. I also know how to work in a team and manage groups of people in the different events I have planned in other RSOs I am currently involved in. I would like you to know that no matter what, I will give my all to do my job.	I want to become a SWE officer because I want to help new and old members in any way I can. I want to empower our female engineers and encourage them to be proud of themselves. Being an officer of SWE would help me to improve my skills and meet more women who have similar interests than me and establish true friendships with them.
Camila	Schrader	Freshman	No	2 semesters				X		X	X						I would like to contribute to SWE by setting aside more of my free time and thinking of new ideas to better the organization.	I want to become a SWE officer to continue improving and demonstrating my leadership skills, and to assist in making SWE a better organization.
Izzy	Shackelford	Freshman	No	1 Semester								X	X				I am passionate about being a female in this male-dominated field and wanting to continue the great successes that females in SWE have already accomplished. I am wanting to continue and improve the number of women that go into STEM and help these women feel more confident in this workplace. I would do this by always encouraging my fellow peers and telling them to follow their dreams. My end goal is to have a group of women who are confident and push one another to become an empowering voice in their workplace.	I would greatly value the opportunity to become a SWE officer because it would allow me to gain leadership experience while also giving back to a great organization that empowers women in the workplace. As a female engineer, I treasure the chance to work alongside fellow female engineers gaining valuable professional experience. If I were given this opportunity, I would embrace furthering this organization in its academic and professional ways. It has been a long sought-after goal of mine to join this community since attending the University of Arkansas.
Barrett	Weidman	Freshman	No	Since August 2018								X	X		X		I would like to not only increase membership, but member retention and activity within SWE. I hope that I will be able to come up with exciting events to get a good member turnout. I also hope that members will find these events beneficial to either their well-being or their professional futures. I am pretty creative and love coming up with event ideas, so I believe I could contribute a lot to the area of involvement.	I enjoyed the SWE events I went to last semester and found it a great way to get to know people in other engineering disciplines that I wouldn't get to meet otherwise. I'd like to be an officer to be more active and interact more with others so that I can make more friends in SWE. I also think it's a great organization and would like to become more involved in it.
